

III Meeting Biotechnology and Agriculture: The Future is Now

14 June 2013
Agriculture National Fair, CNEMA,
Santarém, Portugal

Translation Available – English-Portuguese and Portuguese-English

Please contact CiB Portugal to do the registration until 12th June 2013 – Free of charge

Program

9h45	Registration
10h	Opening Session
10h15	1983-2013 – 30 Years of Transgenic Plants Maria Salomé Pais – Department of Plant Science at Faculty of Sciences – University of Lisbon
10h45	Questions & Answers
11h00	Coffee Break
11h15	Farmers and Scientist International Network for Agrobiotechnology Fabio Niespolo – FSN - Farmers and Scientist Network
11h45	Questions & Answers
12h00	Constraints in EU agricultural crops and the possible/available biotechnological solutions Agnès Ricroch - Université Paris-Sud /CNRS France - Centre national de la recherche scientifique / AgroParisTech
12h45	Questions & Answers
13h00	Lunch
14h30	Economic and Political Impacts of EU policies on GM crops for Agriculture and Food Production Pedro Gallardo – ASAJA - Asociación Agraria de Jóvenes Agricultores (España)
15h15	Questions & Answers
15h30	Brazilian Farmer: The use of multiple stacks transgenic crops in Brazil Diego Alessio
16h15	Questions & Answers
16h30	Coffe Break
16h45	Portuguese Farmer: The experience of producing BT maize in Portugal Gabriela Cruz
17h15	Questions & Answers
17h30	Conclusions
17h45	Closing Session

CONTACTS & REGISTRATION

Registration until 12 June 2013 – Free of charge

Please contact us to do the registration

CiB Portugal – Centre for Biotechnology Information

E-mail – cib@cibpt.org

MP – 00351 961 775 120

Website – www.cibpt.org

CIB - Centro de Informação de Biotecnologia (Center for Biotechnology Information, Portugal) – www.cibpt.org - is a nonprofit and private association created in 2002. Its aim is promoting communication of Biotechnology in Portugal and in the Portuguese-speaking countries.

CiB contributes to clarify different audiences about biotechnological applications in everyday life. Topics covered are new technologies applied to agriculture, industry, environment, food and feed and medicine.

Over the recent years, CiB has participated in public debates and in political hearings, it was involved in development of legislation, regulation and standards on biotechnology issues; organization of events for clarification and training of different audiences (e.g., scientists, journalists, farmers, students and general public), and production of content to promote the public understanding of biotechnology.

To accomplish these goals, CiB is supported by different entities: companies, industries, public and private institutions and even associated sole proprietorships.
